Professional Experience

United Airlines

Gurugram, India

Analyst, Decision Sciences

Aug'25- Present

- Developed and engineered a Python (PyQt) application to automate scenario planning workflows, **reducing manual effort by 18+ hours per scenario** and **delivering ~\$900K annual cost** savings.
- Launched a real-time, interactive decision-support platform for scenario exploration and visualization across markets, enabling **50+ planners and leaders** to optimize timing strategies, strengthen competitive positioning, and drive high-impact expansion decisions.
- Enhanced LLM-based natural language query system using prompt engineering and few-shot learning, **improving query accuracy by 11%** and enabling self-service analytics for non-technical users.

Associate Analyst, Integrated Operations Strategy

Jul'23- Jul'25

- **Unlocked \$36M+ in operational cost savings** by architecting data pipelines and analytical framework to optimize Minimum Connection Time, reducing missed connections from ~3% to 1% across key hubs.
- Led the development of an asset movement analysis initiative, **delivering \$41M+ in operational impact** by identifying discrepancies between planned and actual movements and enabling data-driven resource allocation decisions.
- **Improved asset availability forecasting accuracy by 19%** by building a regression-based model with feature engineering, predicting asset counts across locations to support capacity allocation and maintenance planning.
- Delivered a Power BI dashboard to unify key planning metrics into a single view, eliminating manual analysis and enabling leadership to make faster, data-driven strategy decisions at a major hub.

Zepto

Bengaluru, India

Operations Intern

Jan'22 - Jul'22

- Reduced product expirations by implementing FIFO inventory practices and identifying process gaps through damaged stock analysis, **delivering ~2% revenue impact**.
- Optimized product availability by analyzing early-day stockouts and time-based demand patterns, optimizing inventory for high-demand items, impacting ~10% of products.

Skills

Python (Pandas, NumPy, OOP), SQL, PySpark, ETL Pipelines, Data Warehousing, Data Cleaning & Transformation, Data Analysis, Data Modeling, Time Series Forecasting, Regression, Optimization, Scenario & Sensitivity Analysis, KPI Design, Root Cause Analysis, Predictive Modeling, Statistical Analysis, Power BI, Excel (Advanced), Power Apps, Power Automate, Palantir Slate, Google Apps Script, HTML, CSS, JavaScript

Education

Punjab Engineering College

Chandigarh, India

Bachelor of Technology, Electrical- CGPA: 8.2

Aug'19 - Jun'23

Awards and Recognition

Sky Laureates Award, United Airlines

Mar'26

For building a network planning tool and interactive schedule visualization platform enabling large-scale analyses

IKC Ambassador Award, United Airlines

Jan'26

For developing Power Platform applications that replaced manual workflows and solved cross-team technical challenges

1K Category Award, United Airlines

Mar'25

For building a data pipeline to analyze connection risk, optimize transitions, uncover patterns, and improve forecasting

Extracurricular Activities

Joint Chief Secretary Technical Societies (JCSTS), Punjab Engineering College

Jul'22 – May'23

- Administered **INR 20L+** of funds across 13 technical societies (1000+ members)

Co-Convener, PEC Orientation 26 Batch

Jul'22 – Nov'22

- **Led a 70+ member team** to organize a 7 – day Orientation program for 840 freshers.
